You need this package:

- if you are an in-house marketing or other business professional in need of a powerful, versatile, professional set of digital presentation tools.
- if you are a **mobile salesperson, lecturer, litigator, or teacher** in need of a set of high-powered, yet compact and light-weight, digital presentation tools. This versatile package is equally effective in an auditorium, an office conference room, a courtroom, or a trade show booth.
- if you are frustrated with your existing presentation tools. **Whiteboards and overhead projectors just don't cut it anymore**; your audience expects more—now you can really deliver.
- because the included components are all professional quality from industry-leading manufacturers and are backed by impressive warranties.
- there is very little that you will need to do when you receive this package; **we prepare, optimize, and customize it specifically for your use.**
- because this complete, ready-to-use Digital Presentation package will help you make your point!

INCLUDED HARDWARE

AVerMedia AVerVision CP355 Portable Document Camera

Why we like it

We've had nothing but great experiences selling and using AVerMedia document cameras. They are well- built, offer a huge range of features, and are backed by a 5-year AVerMedia warranty.

Here's a brief list of the features that make the CP355 our choice of document camera for this package:

- HD 720p widescreen output resolution (1280x720)—the wide-screen allows a larger shooting area, it closely matches the resolution of the accompanying digital projector, as well as modern laptop screen resolutions, and it is better suited for special usage, such as split screen presentation
- 15.75" x 11.8" wide-angle shooting area
- Auto or manual focus
- 80x total zoom - 5x optical
- Color/b&w/negative/mirror/reverse/freeze effects
- Onboard image capture
- VGA, DVI-I, S-video, composite, USB 2.0 ports
- Integrated LED lamp
- Laser positioning guides
- Remote control with laser pointer

Additionally, the CP355 weighs only 5.7 lbs. and folds to a compact 9.6" x 14" x 2.5" for easy storage and travelling.

What we do

- We unpack and inspect the document camera and all of its accompanying parts and paperwork to ensure that everything that should be enclosed is present and that everything has arrived unscathed.
- We test every ability and function of the camera thoroughly; then we color-code the appropriate cables and ports.
- We prepare a condensed set of operating instructions to work with our color coding to minimize any confusion, making installing and using the document camera as easy as possible for you.

InFocus IN1102 Mobile Projector

This projector was selected because of its small size and large feature set. Its dimensions measure just 8.3" x 7.1" x 2.5" and it weighs just 2.75 lbs. It projects WXGA images, which matches the output resolution of the AVerVision camera and also the screens of most modern laptops. This makes it very easy to switch between video sources. It offers VGA, S-Video, composite, USB, and audio inputs. This projector can be positioned as close as 3.9' and as far away as 29' from the screen, giving you a huge amount of flexibility.

What we do

- We unpack and inspect the projector and its accompanying parts and paperwork.
- We test every ability and function, including testing its connection to the document camera.
- We color-code the cables and ports, then we condense the instructions so that connecting the projector to the document camera or another device is as easy as possible for you.

AVerMedia AVerVision CP355 Carrying Case - VISIONPCC

It is very important to protect your document camera between uses and to make it easy to travel with. This case will hold the document camera, cables, and some additional material. We include this high quality carrying case from AVerMedia with every document camera.

Kensington ComboSaver Combination Notebook Lock - 6' cable

We include two reinforced steel security cables with this presentation package — it's too easy for someone to walk away with your expensive equipment, and we think that a proactive impediment is a good thing. This is cheap insurance. The key is not to be lazy, but rather to be paranoid and to use it when it's appropriate. The AVerMedia camera and InFocus projector can each be secured with its own security cable.

Belkin 7-outlet business-grade surge protector - 6' cable

It is very important to protect your equipment from electrical maladies such as surges. This high-quality surge suppressor is another example of cheap insurance. Never plug your equipment directly into a power outlet without quality surge protection.

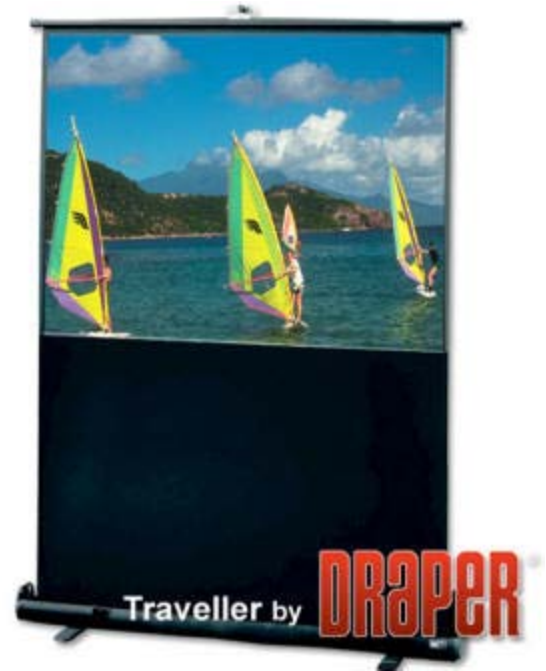

OPTIONAL HARDWARE

Draper Traveller Portable Projection Screen - 92inch diagonal - 16:9 Model# 230130

This portable projection screen is equally perfect for ad-hoc office presentations and the traveling presenter. Many venues do not have projection screens and this option eliminates that problem. The screen's aluminum container is set up on the floor or on a table, then the screen is pulled up and out and locked into place at the desired height.

The screen surface is high-contrast gray, which helps to keep blacks black and whites white in environments where ambient light cannot always be controlled. This screen is very luggable, weighing just 25 lbs.

Draper Padded Carrying Case for Traveller Portable Screen - Model# C091.021

We recommend this padded carrying case if the screen will spend a lot of time on the road. This case will protect it from dents, scratches, and dust and will extend the life of the internal mechanisms. This case is built of tear resistant nylon and has a carrying handle and a detachable padded shoulder strap.

TIME AND SHIPPING

Preparation & Testing Time

Barring any unforeseen circumstances, build-up, customization, and testing time for this solution is approximately 2 weeks, at which point it will be packaged and shipped to you.

Shipping Method

We provide **FREE** FedEx Ground service to the lower 48 states. Standard FedEx rates will apply to orders shipped to Hawaii and Alaska.
