

Traveller

Front View NTSC Format

Sets Up in Seconds.

It doesn't make sense to hit the road with a 5-pound projector and a 35-pound screen. Lighten up with the Traveller.

Designed with today's presenter in mind, the Traveller has a strikingly modern appearance. It is lightweight with a clean, simplified design.

Setting up the Traveller is easy. Just place it on the floor or table. Screen height adjusts instantly, at the touch of a finger. An infinitely adjustable telescoping upright tensions screen in desired position. Upright stores in case.

Viewing Surface

Fiberglass matt white viewing surface is the ideal choice for today's computer-driven presentations. Compatible with resolutions up to 1200 x 1600 and beyond, with a broad viewing cone and accurate color rendition.

Also available in glass beaded and High Contrast Grey. The Traveller includes enough black "rise" below image to set units on either the floor or a table. 3/4" black masking borders are standard.

Standard Features

Case

Self contained in a sturdy extruded aluminum case, the Traveller is durable and easy to carry.

Shoulder Strap

Use the built-in carrying handle, or sling it over your shoulder with the detachable shoulder strap.

Optional Features

Padded Carrying Case

Your Draper Traveller will look better longer with our padded carrying case. It's flexible and lightweight, yet incredibly durable. Constructed of 1/2" thick shock-absorbing material sandwiched between tear-resistant black nylon inner and outer sleeves.

Case protects screen from dents, scuffs and scratches. Its zippered case has a heavy nylon strap (removable) for easy transport.
